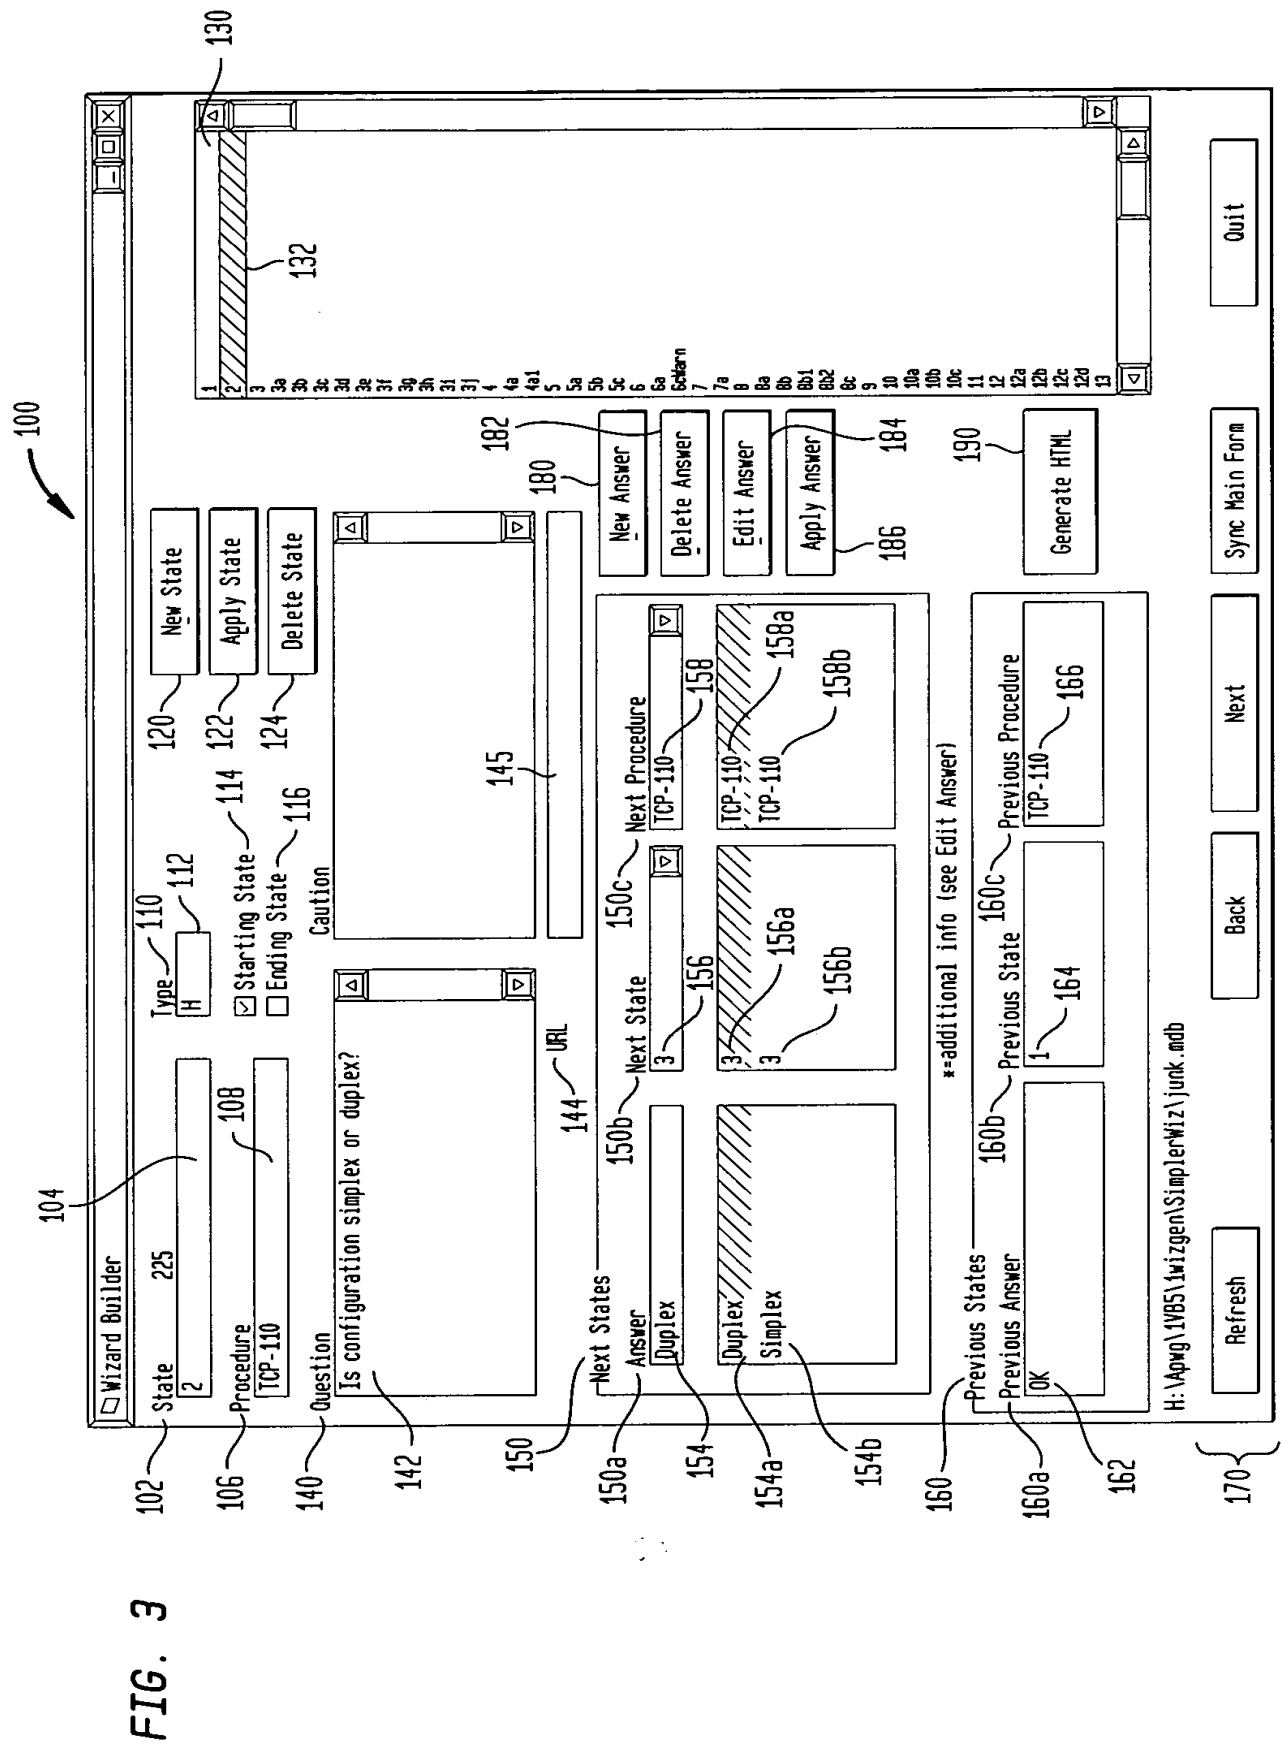

Figure 1 is a screenshot of the 'Wizard Builder' application window. The window has a standard Windows-style title bar and menu bar. The main area is divided into several functional sections. On the left, there's a 'File Special' section with a dropdown menu showing 'proc1'. Below this, there's a 'State Name' field with '1' and a 'Question Type' dropdown set to 'String'. The 'Question' field contains the text 'What is your name?'. To the right of the question, there's an 'Answer' field with 'OK', a 'Next State' dropdown with '2', and a 'Next Procedure' dropdown with 'proc1'. Below these, there's a 'Range' section with 'Min' set to '1' and 'Max' set to '20'. Further right, there's a 'Generate HTML' section with two buttons: 'Generate HTML for this Procedure' and 'Generate HTML for all Procedures'. At the bottom, there's a navigation bar with buttons for 'Previous States', 'Previous Answer', 'Previous State', 'Previous Procedure', 'Next', 'Back', 'Forward', and 'Quit'. The window title is 'Wizard Builder'.
